### REASONS FOR ALLOWANCE

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/23/2006 has been entered.

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed over the prior art of record. None of the prior art discloses or suggests a LCD device comprising a reflecting plate having wrinkle-like unevenness on the surface thereof, wherein at least part of the wrinkle-like unevenness has a first linear part extending in a first part, a second linear part extending from the top end of the first linear part in a second direction different from the first direction by certain angles to a predetermined side, and a third linear part extending from the top end of the second linear part in a direction which different from the second direction by certain angles to the predetermined side, the wrinkle-like unevenness having a directional pattern, the wrinkle-like unevenness extending primarily in either horizontal or vertical direction on the display plane of the LCD device. Claim 33 is allowed over the prior art of record because none of the prior art discloses or suggests a LCD device having the combination of the feature "a reflecting plate having wrinkle-like unevenness on the surface thereof, the wrinkle-like unevenness having a plurality of protrusions" and the feature " said plurality of protrusions are *arranged in parallel with each*

*other* when viewed from a direction perpendicular to the reflecting plate, and *each* of the protrusions has a first linear part extending in a first direction, a second linear part extending from the top end of the first linear part in a second direction different from the first direction by certain angles to a predetermined side, and a third linear part extending from the top end of the second linear part in a third direction different from the second direction by certain angles to the predetermined side". The remaining claims are also allowed since they depend on the allowed claims 1 and 33.

Doi et al (US 2004/0001174) disclose a LCD device comprising a reflecting plate having wrinkle-like unevenness on the surface thereof, the wrinkle-like unevenness having a plurality of protrusions, said plurality of protrusions are arranged in parallel with each other when viewed from a direction perpendicular to the reflecting plate, each of the protrusions having first and second linear parts. However, Doi et al do *not* disclose the feature "at least part of the wrinkle-like unevenness has a first linear part extending in a first part, a second linear part extending from the top end of the first linear part in a second direction different from the first direction by certain angles to a predetermined side, and a third linear part extending from the top end of the second linear part in a direction which different from the second direction by certain angles to the predetermined side

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
